

# Environment Setup

## SendGrid Account Creation

The screenshot shows a web browser window with the URL `app.sendgrid.com/guide`. The page is titled "Welcome, Fadal!" and provides instructions for getting up and running quickly. A blue banner reads "Send your first emails with Twilio SendGrid". Below this, the "Create a sender identity" section explains that a sender identity is the "from" email address and offers two ways to create one: "Create a Single Sender" (highlighted with a yellow box) and "Authenticate a domain instead". An illustration shows an email header with "Your Business" as the sender and "jane.doe@your\_business.com" as the email address. At the bottom, a "Send your first email" section states that a sender identity must be created first. The left sidebar contains navigation links for Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The bottom status bar shows a reputation of 100% and account usage information.

SendGrid

app.sendgrid.com/guide

Welcome, Fadal!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

Create a Single Sender

Authenticate a domain instead

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more about this.](#)

Your Business <jane.doe@your\_business.com>  
to me

Send your first email

Please create a sender identity before sending your first email.
